UPSKILLING & RESKILLING
Artificial Intelligence Certification Courses

Program Prospectus

Artificial Intelligence Certification Courses

The World Economic Forum predicts that while artificial intelligence may replace around **85 million jobs by 2025**, it will also **create approximately 97 million new roles.** This net gain in employment underscores AI's capacity to drive economic growth, diversify employment opportunities, and restructure existing roles.

Reskilling and upskilling Georgia's workforce to embrace these artificial intelligence advancements will be essential to meet the growing demand for employees equipped with these skills. Combining industry-certified and experienced instructors with advanced online instruction, we deliver innovative technology training that provides knowledge, practice, and experience to assist with earning valuable certifications and career advancement.
