2025 Georgia's Day of Code Impact Report

10:55AM - 11:25AM

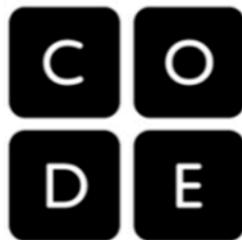

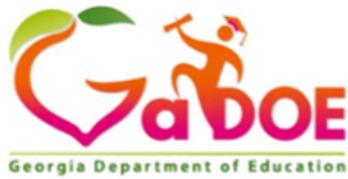

CODING CAREER PATHS FOR HIGH SCHOOL STUDENTS

Delisha Hodo is the Assistant Director of Advising – Academies at SANS and a passionate advocate for access and diversity in cybersecurity. She leverages a 5-year background in educational non-profits, having helped K-12 students earn millions in scholarships while guiding them to higher education. Delisha previously led the SANS HBCU+ initiative, which provided free cybersecurity training and certifications, demonstrating her commitment to empowering underrepresented students in tech. She is excited to moderate this panel and inspire the next generation of coders.

Thanks to Our Community Partners

We are grateful for our community partners, whose collaboration made 2025 Georgia's Day of Code a success. Through engaging coding workshops, STEM college and career panels, and family-focused sessions on AI and emerging technologies, the event expanded access to computer science education for students across metro and rural Georgia. This statewide impact was made possible by the collective leadership, expertise, and commitment of our partners, presenters, panelists, and sponsors.

Letter from the Executive Director

I am proud to share TAG Education Collaborative's 2025 Georgia's Day of Code Impact Report, an executive overview of our December 5th event that broke participation records and introduced engaging, educational STEM content to over 9,275 students across metro and rural Georgia at no cost. 2025 Georgia's Day of Code maximized impact for students in underserved communities and demographics, breaking down barriers to computer science learning. By providing free access to interactive workshops and college

and career panels to thousands of students, TAG-Ed is achieving our mission to develop future innovators and empower Georgia's tech ecosystem.

I couldn't be more proud of the work by our TAG-Ed staff, our community partners, and all those who contributed to making 2025 Georgia's Day of Code a success. Your collective dedication is fueling transformative coding and AI learning opportunities and providing computer science access to students nationwide. The impact in this document isn't just about data and milestones, it's about building an educational foundation for each student to launch their higher education and career goals. As we look ahead to 2026, we reflect in gratitude on your continued support of TAG-Ed's mission and Georgia's Day of Code.

Together, we're developing Georgia's future workforce through outreach, education, and access to opportunities.

-Dr. Loretta Daniels
Executive Director, TAG Education Collaborative

Executive Overview

2025 Georgia's Day of Code delivered one of TAG-Ed's most far-reaching STEM engagement events. With 9,275 registered participants, the event successfully connected students, educators, and partners across Georgia and beyond.

Call to Action

- Communicating early registration numbers and anticipated impact to drive sponsorships (11/30/2025)
- Urgently driving sign-ups before registration closes (12/1/2025)
- Final call: Last chance to sign up (12/3/2025)
- Post-Event Marketing: Thanking TAG-Ed's community partners for a successful event (12/8/2025)

TAG-Ed Education Collaborative

Georgia's Day of Code December 5, 2025

THE PROBLEM

Disparities in computer science access persist.
In 2023, only 60% of U.S. public high schools offered computer science programs.
Young women make up only 32.5% of all computer science students.

OUR SOLUTION

Georgia's Day of Code offers students equal access to coding and AI learning.

This virtual event is free to register for students of all ages.

Includes:

- Hands-on coding workshops
- College and career panels
- Community discussions with Georgia Dept. of Education

Read the agenda online to learn more, and register today!

2025 Georgia's Day of Code Agenda

9:00 – 9:15 AM: Welcome and Opening Remarks

9:15 – 10:15 AM: AI and Coding Sessions

10:20 – 12:00 PM: Career Panel Discussions

10:20 – 10:50 AM: Aspirations in Computing: College Student Perspectives

10:55 – 11:25 AM: Coding Career Paths for High School Students

11:30 – 12:00 PM: The Role of AI in Careers

Following 2025 Georgia's Day of Code

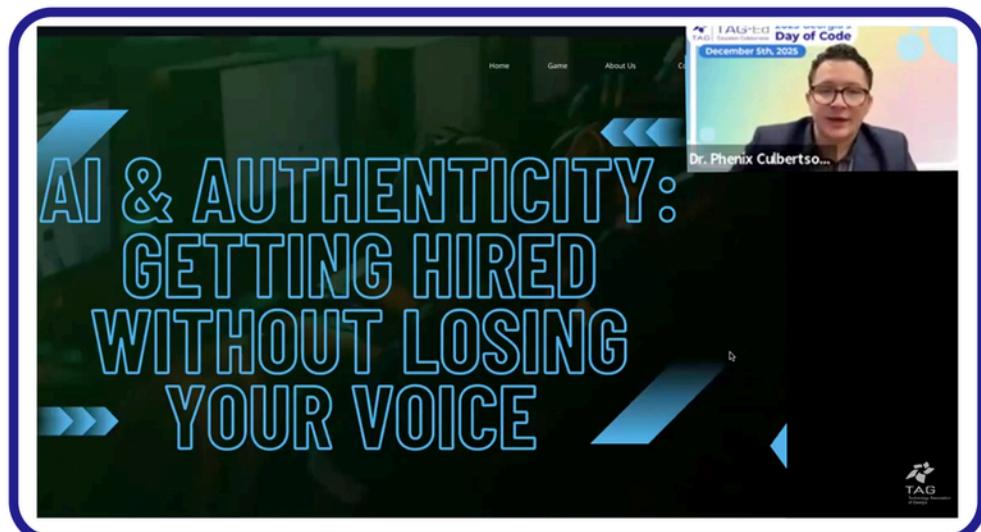

Program Impact Summary

- Expanded STEM exposure statewide and outside
- Delivered high-value computer science content at no cost to participants
- Strengthened partnerships and educator engagement across Georgia

First-Ever Community Post-Event Workshop

Reimagine Your Job Search with AI (3-4 PM, Dec. 5, 2025)

- Facilitated by Dr. Phenix Culbertson, Director of Employer Relations, Georgia State University, Robinson College of Business
- 69 registered, 34 attended live
- Hands-on exercises using AI to optimize résumés, cover letters, networking prep, elevator pitches, and interview readiness
- Offered free access to IBM SkillsBuild course on creating AI-assisted elevator pitches

Looking Ahead to 2026

Building on the success of 2025, TAG-Ed plans to:

- Introduce more interactive student content such as cybersecurity
- Expand grade-level specific tracks for tailored learning
- Add a high school-only panel, in addition to college and career panels
- Expand interactive elements such as trivia and similar activities

Recommendations for 2026:

- Provide more opportunities for student-created content to be showcased
- Consider a computer/coding cup competition focused on computer science, design, and broader tech skills
- A challenge on Georgia's Day of Code that leads to the Innovation Challenge and other ongoing programs

Partnerships & Continuity: Collaborate & Cross-Promote

- CS for Georgia app and design challenge
- Raspberry Pi “Coolest Projects” and related events
- Innovation Challenge in April
- Expand planning committees (including presenters and partners) starting in summer to co-design content, challenges, and structure

Future Opportunities

Enhanced Program Scale

Increase participation across more schools, counties, and grade levels through expanded outreach.

Interactive Student Content

Develop hands-on coding labs, app challenges, and gamified learning experiences tailored to different age groups.

Community Expansion

Build on the success of the first post-event workshop by offering additional community-focused sessions that connect STEM skills to workforce readiness.

Hybrid Engagement Models

Combine in-person and virtual programming to ensure accessibility statewide and beyond.

Marketing and Visibility

Amplify sponsor brands through co-branded campaigns and social media.

Educator Support

Provide resources, training, and toolkits that help teachers integrate computer science into their classrooms.

Sponsorship Value Proposition

Georgia's Day of Code offers sponsors a significant opportunity to:

- Expand program scale and reach
- Enhance marketing and visibility
- Support additional community workshops
- Provide resources for interactive student content and hybrid models

2025 Georgia's Day of Code engaged over 9,275 participants nationwide, delivering impactful STEM content and meaningful educator outcomes. For the first time, the event extended into the community with the AI workshop, Reimagine Your Job Search with AI, underscoring its ability to evolve and broaden reach.

This success demonstrates strong momentum and clear value. With future support, Georgia's Day of Code can expand programming, increase visibility, and continue preparing the next generation of innovators nationwide.
